

**IN THE SPECIFICATION:**

Please amend the paragraph at page 10, line 20 to page 11, line 2 of the specification as follows:

The control system for the adjustable vanes (IGV) described above is associated with a system 16 for bleeding hot air from the compressor exhaust (known as and IBH, an acronym for “inlet bleed heating system”) for keeping the compressor exhaust, which is introduced into the inlet of the compressor, in standard (ISO) conditions.

Please amend the paragraph at page 11, lines 3-5 of the specification as follows:

The bleed system (IBH) 16 is shown in Figure 1 and is controlled by programming the opening of the valve in accordance with the angle of rotation of the adjustable vanes (IGV).
